

Atlanta Biofilter Media

Key Benefits

- Designed to filter stormwater runoff and provide adequate growing media for plant uptake of captured nutrients
- Mechanically proportioned and blended for homogeneous results
- Designed to meet texture, permeability, organic matter and nutrient requirements
- ullet Locally sourced from recycled materials

Application

- For use in bioretention basins and bioswales
- Where well-draining, sandy topsoils are required

| Typical Analysi | is |
|-----------------|----|
|-----------------|----|

| Sand | 75-90% |
|---------------------|-------------------|
| Silt | 0 - 25% |
| Clay | 0 - 10% |
| Organic Matter (OM) | 5.0 - 10.0% |
| pH | 6.0 - 7.5 |
| Phosphorus (P) | 10 - 50 ppm |
| Infiltration Rate | 1 in/hr (minimum) |

| Composition | Organic Compost Screened Soil Sand |
|--|---|
| Bulk Density prior to full compaction | 1.3 tons/yd³ (approximate) assumes moderate compaction and average moisture |
